Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I, claims 1-9, in the reply filed on 4/10/2009 is acknowledged.

Claims 26-32 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Group II, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 4/10/2009.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear from the language of claim 4 how radially outer portion of the *stem* serves an extension of the *projections*.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Mendes et al. (US Pat. No. 5,580,353). Mendes et al. discloses the following of the claimed invention: a bone implant comprising: (a) a core (330) having a first end wall (right side), a second end wall (left

side) and defining a centerline extending centrally of and between said end walls, and a circumferential side wall portion parallel and extending between said end walls (Figs. 10-14); (b) at least two axially elongated projections (upper elements 40 in Fig. 14), (i) extending from and along said core, (ii) being disposed at a uniform circumferential spacing from each other about the centerline (Fig. 14), (iii) having a rounded contour when viewed in axial direction of the core (Fig. 9), and wherein each projection is formed by a plurality of fins (projections created by depressions, 41) disposed in a row parallel with said centerline; and (c) said core and said projections being dimensioned to contact inner wall sections of a socket formed in a bone and, said socket having a predetermined size and configuration compatible with that of the implant, when the implant has been tapped into the socket.

Mendes et al. discloses claim 2 and 4 in Fig. 14.

Mendes et al. discloses the following of claim 3: the bone implant of claim 1, further comprising at least two elongated stems (lower elements 40) extending from a location at the second end wall of said core and having a free end disposed beyond said second end wall, each stem defining a stem axis (Figs. 9, 14).

Mendes et al. discloses claims 5-9 as shown in Fig. 9.
